PROFESSIONAL SUMMARY

Fresh BSIT graduate majoring in Computer Security with internship and project experience in IT troubleshooting, software development, automation, networking, and technical research. Familiar with computer systems, mobile development, data processing, and workflow integration. Eager to apply technical skills and continue developing expertise in IT and automation.

TECHNICAL SKILLS

IT Support: Computer Troubleshooting, Software Installation, System Configuration, Basic Networking
Development: Kotlin, Python, C#, HTML/CSS/JavaScript, SQL, SQLite
Automation: n8n, UiPath, OpenRPA, Browser Automation, Data Extraction
Tools: Android Studio, Firebase, Git/GitHub, VS Code, Cisco Packet Tracer, Arduino IDE, AWS
Networking & Security: VLAN, Routing, Access Control, Basic Network Security

EDUCATION

PHINMA University of Pangasinan — BS Information Technology, Major in Computer Security
Graduated June 2026

INTERNSHIP EXPERIENCE

Research Intern – Automation | Actimai Philippines Inc.
December 2025 – March 2026

- Conducted research and data processing for automation-related projects.
- Assisted in testing and validating automated workflows using UiPath and OpenRPA.
- Performed data processing and filtering using Excel and C# LINQ.
- Prepared documentation and collaborated with technical and research teams.

SELECTED PROJECT EXPERIENCE

Telegram Receipt Automation — *Automation Workflow Assessment* | *n8n*

- Built an n8n workflow integrating Telegram, AI image analysis, Google Sheets, and Google Drive.
- Extracted receipt information including merchant, amount, and transaction date.
- Automated data recording and receipt file organization.

PHILGEPS Bid Notice Abstraction and Extraction Automation — *Internship Project*

- Developed an automated workflow for extracting bid notice information from the PHILGEPS website.
- Applied browser automation, data extraction, and validation techniques.

Smart Waste Management System with Secured Data Transmission — *Capstone Project*

- Developed a mobile-based system for remote waste-level monitoring.
- Worked on mobile application, IoT monitoring, Firebase, and data transmission functions.

SecuSnap: Network Security Plan for a Marketing Agency — *Academic Project*

- Designed a network security plan using VLAN segmentation, routing, and access control.
- Applied networking and security concepts using Cisco Packet Tracer.

TRAINING

UiPath Academy Automation Developer Associate Training — February 2026
Python + AWS Course — Zuitt — October 2025
